Claims 11-45 are pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11-30, 32, 33, 36-37, 42, 43, 45, drawn to baccatine III derivatives and the process of making the same, classified in class 549, subclass 229.
- II. Claims 31, 44, drawn to oxazolidine derivatives and the process of making the same, classified in class 548, subclass 215.
- III. Claims 34, 35, 38, 39, 40, 41, drawn to baccatine III and V derivatives, classified in class 549, subclass 510.

The above delineated groups are distinct and separate because of their recognized divergent subject matter based on their different chemical structures, i.e., different ring size and ring chalcogens as shown by their different classifications. A search of one group is not required for the search of another group. A reference of one group would not suggest and/or render the other group obvious is the absence of secondary teachings. Thus, the restriction requirement as indicated is deemed proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1625

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
